

Strictly my own opinion...

I know some classified stuff.

People wonder – what is the big secret that no one will tell us? And others wonder – why does everyone say they have no idea who is driving the UFOs (when we all know, they have the pilots in custody/cold-storage)?

Here is my take on this 80-year silence. The majority of pilots flying UFOs are not “alive” but are ORGANIC THINKING MACHINES. **Not** just SYNTHETIC LIFEFORMS, but also ASTRO-BIOLOGICAL lifeforms with functioning organs – and no need to reproduce. Don’t just dismiss them as robots or androids – these are advanced Humanoid Drones programmed and controlled by advanced lifeforms that are many-time-over our superiors. And WE DO NOT KNOW WHO THEY ARE and IT SCARES US.

They think it will scare you too, especially when you learn they are DIMENSIONAL and can appear and disappear at will, go through solid structures, and fill our minds with information. Isn’t that a really good reason not to tell us?
