

Wikileaks is about to confirm the story that The Common Sense Show told four years ago, in that Ambassador Stevens was **set up to die** because his stories of gun-running, child trafficking and drug-running on behalf of the CIA (Central Intelligence Agency) was to promote regime change in Libya -- using terrorists funded by these illegal activities. This fact was leaking out and it was only a couple of months before the re-election of Barack Obama in 2012.

Ambassador Stevens had to be silenced. And Petraeus had to be put in a place where he wouldn't be forced to testify before Congress, because he could not afford to take the fifth before Congress.

At the same time, Hillary Clinton was broadcasting Stevens' whereabouts and refusing to provide the extra protection that Stevens was so desperately requesting. Being that Stevens was the CIA contact for activities in Libya; the Director of the CIA, David Petraeus, would have known about the activities of Chris Stevens.

To protect Obama's 2012 re-election, both Stevens and Petraeus had to be gone. There were those in the Intel Community that knew what was going on and vowed to never let Clinton become President. These same people are working behind the scenes for the Recount Effort.

Wikileaks reports:

This is to inform you that Wikileaks will soon be releasing Clinton emails which will demonstrate the following:

Clinton's Emails

- 1) Qatar Approached the Clintons about the Qatar-Turkey pipeline (also made donation to CGI & Bill's \$1 million birthday gift).
- 2) The only country the pipeline has to cross through not currently "friendly" with the Clinton cartel is Syria.
- 3) ISIS was formed and used to topple the other oil competitors in the region (Assad, Gaddafi, etc.) in order to create a Clinton/Qatar/Saudi/Turkey/ISIS oil empire monopoly.
- 4) Obama's job was to keep Erdogan in control of Turkey in order for the deal to move forward.
- 5) Hillary wants NATO/UN to sanction (block) the flow of Russian oil to Europe, so her cartel would control all of the oil being sold to Europe.
- 6) Russia accused Turkey of buying oil from ISIS, namely Erdogan's son-in-law. Russia's economy is directly controlled by their oil production. That's why they are fighting in Syria. If they allow the Clinton cartel's plan to go through, Russia's economy will crash over-night. But Hillary must force Russia out of Syria for her plan to work.
- 7) Ambassador Stevens found out what was going on through Gadhafi's former generals. When he was going to come forward, Hillary left him to die at the hands of the rebels she had armed. That would explain why Gadhafi's men were the only ones that finally arrived to help. They had been friendly with Ambassador Stevens.

It is clear that Putin would be a fool to allow Clinton and her gang of thugs to continue with their plan. No wonder Clinton tries to blame the Russians for everything, she is the main culprit of a world being brought to the precipice of World War.

Aaron Klein, the Breitbart Bureau Chief for Jerusalem revealed, in a Breitbart publication dated March 1, 2016, that “the email from April 10th, 2011, the State Department employee, Timmy Davis, forwarded an email to the server by Clinton’s aide, Huma Abedin.” Please note that the time of this revelation,

Huma Abedin, was not yet a household name. That series of emails would eventually result in catastrophic consequences for Ambassador Stevens.
